LEXMARK™

IBM Typewriters
by Lexmark

- Made to complement your personal computers
- Complete labels, envelopes and forms cost effectively
- Professional office quality and performance

Discover how much an **IBM**®

For more than a half century, IBM has led the office typewriter market with outstanding technology, reliability and unsurpassed quality. In this era of e-mail, faxes and networked printers, the typewriter has taken more of a supporting role to PCs, yet the original joy and convenience of using a typewriter remains — from the incomparable print quality of the typed characters to the classic feel of the keyboard.

These Wheelwriters® are the most advanced IBM typewriters ever. They are designed to complement your PC workstation, doing some jobs more cost effectively than a PC. Some routine office jobs our typewriters are especially good at include filling out multi-part mailing labels, purchase orders or invoices, typing envelopes and completing forms or applications. We have typewriters that are ideally designed to handle longer word processing applications like form letters and multi-page documents. They can't be beat for performance and value.

Each IBM typewriter possesses valuable features to assist making each of your routine jobs easier. Characteristics common to all our typewriters include the classic Selectric Touch™ keyboard, high durability, easy ribbon changes, clearly marked feature keys, outstanding office print quality and high resale value. Some of these typewriters also boast special features such as an optional diskette drive, giving you unlimited text storage, and all of the models can be configured as an impact printer for your PC. For a detailed list of functions unique to each specific typewriter, please refer to the specification chart on the back page. This quick reference chart will help you choose the right typewriter for your typing applications.

IBM Wheelwriter 1000 Typewriter

The compact Wheelwriter 1000 is everything you need in a basic typewriter, making it the perfect choice for home, office and school. Its versatility for handling a multitude of office tasks along with the Express Cursor Keys and 50K word Spell Check are some of the more popular features. Since we all make a typo now and then, the Automatic Correction feature lets you quickly erase a character or a word anywhere on the page with the touch of a key. If you find yourself filling out the same multipart form often, you'll love the Reprint feature, which allows you to print additional copies in a single keystroke.

Typewriter can do for your office today.

IBM Wheelwriter 1500 Typewriter

The full-size Wheelwriter 1500 is the "Selectric™ replacement," designed to manage a wide variety of your typing tasks. In addition to the features of the 1000, the 1500 includes many advanced features such as Preprogrammed Forms templates that automate and simplify the forms completion tasks in today's busy office. By automatically moving you through the preprinted form and adding non-variable information (such as your name, address and phone number) to the form, the 1500 makes completing forms easy. The 1500 also has 10K of phrase storage, so you don't have to retype frequently used addresses and phrases.

IBM Wheelwriter 2000 & 3000 Typewriters

If your office demands a memory typewriter, the versatile Wheelwriter 2000 and 3000 are just what you need to make your office complete. The 2000 and 3000 make great companions for your personal computer for those short letters, memos, envelopes and forms. The 2000 has 32K and the 3000 has 48K of text storage capability for multiple pages of text storage or preprinted forms. The Directory feature quickly prints out a listing of what you've saved in the typewriters' memory, and if desk space is at a premium, try the compact-sized 2000 — it's over two inches narrower than the full-size typewriters.

IBM Wheelwriter 2500 & 3500 Typewriters

The perfect combination of easy text editing and advanced features is found in the Wheelwriter 2500 and 3500. Each has a two-line display on the top panel for easier text editing and Spell Assist, an advanced spell check feature that supplies alternative spellings from a 120,000 word dictionary. The display is also extremely handy for "prompting" you through the completion of preprinted forms or for looking through the directory of your files. The 2500 and 3500 contain storage capabilities of 48K and 60K respectively, and if you need more memory, the optional 3.5" diskette drive gives you unlimited text storage capacity. If desk space is in short supply, try the compact-sized 2500 — it takes up less space but still can type on legal size paper sideways.

IBM Wheelwriter 7000 Typewriter

The Wheelwriter 7000 is the ultimate in advanced word processing for the office professional. It offers a complete menu of outstanding, easy-to-use features to help you make short work of extensive revisions and complex forms. The 7000 includes a monitor that displays 25 lines of text and can be configured with an optional 3.5" diskette drive if you need more than the 172K of storage capacity.
